PROFILE

Professional summary

Full stack web developer with 15+ years of experience designing, building and maintaining websites and web applications. I specialise in WordPress, React, Next.js, PHP and Tailwind CSS, and I have delivered 880+ projects for 200+ clients across e-commerce, education, SaaS and professional services.

I work directly with clients from discovery to launch, taking ownership of architecture, performance, technical SEO and long-term maintenance. Comfortable across the stack: custom WordPress themes and plugins, headless CMS architectures, REST and GraphQL integrations, MySQL databases and modern CI/CD deployments on Vercel and Netlify.

Known for clear communication, pragmatic problem solving and shipping on time. I am equally happy improving an existing codebase, rescuing a stalled project or building a new product from the ground up.

At a glance

Career highlights

- Delivered 880+ websites and applications for 200+ clients since 2010.
- Led front-end delivery of React and Next.js products at SoftGens since 2016.
- Migrated legacy WordPress sites to modern React and Next.js stacks without losing SEO.
- Built WooCommerce and Shopify stores with payments, shipping and CRM integrations.
- Improved Core Web Vitals and technical SEO on high-traffic client websites.
- Mentored junior developers and set front-end architecture and code standards.

CAREER

Professional experience

Sixteen years of continuous commercial experience, from PHP and WordPress foundations to modern React and Next.js product work.

React.js Frontend Developer

SoftGens • Lahore, Pakistan

JUL 2016 – PRESENT

Lead front-end developer on long-running client accounts, shipping React and Next.js products and modernising legacy WordPress sites.

- Build responsive, accessible web applications with React, Next.js, TypeScript and Tailwind CSS for clients in e-commerce, education and SaaS.
- Translate design systems and Figma wireframes into reusable, component-driven interfaces.
- Integrate headless CMS platforms such as Sanity, Strapi and WordPress REST/GraphQL into decoupled front ends.
- Migrate high-traffic marketing sites from WordPress to React and Next.js while protecting SEO, analytics and redirects.
- Define front-end architecture, API contracts and coding standards; review code and mentor junior developers.
- Maintain existing React systems, fix bugs and improve Core Web Vitals and accessibility.
- Ship to Vercel, Netlify and managed hosting with CI/CD and preview deployments.
- Work in agile, cross-functional teams with designers, back-end engineers and stakeholders.

REACT · NEXT.JS · JAVASCRIPT · TYPESCRIPT · TAILWIND CSS · GRAPHQL · SANITY · STRAPI · WORDPRESS · VERCEL

WordPress Developer

SWS • Lahore, Pakistan

MAR 2012 – MAY 2016

Delivered custom WordPress themes and front ends for agency clients across multiple industries.

- Developed custom WordPress themes from PSD designs with responsive layouts and cross-browser support.
- Built and customised plugins, page templates and WooCommerce stores.
- Integrated social media SDKs, third-party APIs and marketing tools.
- Improved page speed and on-page SEO for client websites.

WORDPRESS · PHP · WOOCOMMERCE · HTML5 · CSS3 · JQUERY · MYSQL

PHP Web Developer

WebRiver • Lahore, Pakistan

JAN 2010 – JAN 2012

Built and maintained PHP websites and database-driven applications for small business clients.

- Developed PHP-based websites and custom features from client requirements.
- Customised front-end templates and connected them to MySQL back ends.
- Handled maintenance, bug fixes and deployments.
